

[2conciliate Business Solutions AB](#) was founded in 2006 and provides tools that prioritise, initiate, implement and manage processes. The company is located in Sweden and have representation in UK, Norway and the USA. The tool is now used in **22 countries**. Clients of 2c8 include, - **BAE Systems, Telenor, Sandvik & Trelleborg** – all large organisations.

Examples of the use of the 2c8 tool:

An example of the extensive use of the 2c8 tool is *Gothenburg City Council* where the tool is used to display the council's processes and organisation on the public website. Any member of the public can go to that part of the site and find out what the processes are of any department from planning to emptying the dustbins. At a higher level, members of the public can see the strategy and business management processes. Because the 2c8 tool allows the linking of documents to its process mapping, it is possible for, say, somebody to look at the planning process and then see the link to the actual planning application document, click on it and then download it.

There are a number of major companies using the tool; for example [Sandvik](#), a technology & engineering company, use the tool to map all of its manufacturing processes, end to end. This company has a turnover of approximately £7 billion and operates in 130 countries. Another example is [Trelleborg Group](#). They are an engineering company operating in many areas of business from aerospace to offshore oil and gas & from automotive to building & construction. They are a major service provider to the oil industry and are a big player in the North Sea, as well as around the world. They operate in some 40 countries (20 offices around the UK) and have a turnover of over £3 billion.

Probably, though, the most significant user and partner for the tool is [IFS](#), a consultancy in ERP who operate in more than 50 countries with 2,700 employees. Their customers include **Sky, Royal Navy, Saab Defence** to name a few. They are now starting to use the 2c8 tool as part of their consultancy discovery and process mapping work.

For more information on the opportunities of partnering in the UK please contact:
