

Pathfinder Projects

Independent IT & Telecommunications Consultancy

Leading the way in Programme & Project Management

Examples of services

We provide:

Project Programme managers to manage customer projects – usually in IT & Telecoms

Project Office Services – for major projects providing project co-ordinators. We provide documentation control hosting & web services as well as things like web & telephone conferencing

Risk Assessment & Management – this might be for organisation where unforeseen risks arisen or where they know that this is an area which is getting right from the start of a project

Business Change Management – by not managing 'change' things can go wrong – not just with the systems & technology but in peoples reaction to change – we have experience in the area and can provide Change Agents & Managers

Project Recovery & Troubleshooting – things do go wrong – look at the Dome & the Wembley Stadium – we have experience being called in and working to bring things on track

Business Advice & Strategy Development – this is about getting it right at the beginning – we have associates skills & experience to help organisation

Business Analysis & Business Process Improvement/Re-engineering – how an organisation does things is not always the best and with changes in their markets & customers the business processes & procedures need reviewing & improving. Before we go out & buy software or systems this aspect should be prepared

Audit, Survey and Due Diligence – often needed for company takeovers contract changes, business improvement

Back Office Services – It can be Admin, Contact Management, Field Support, Communications Support – we can provide these often cheaper than larger companies, especially when related to project or consultancy services

Pathfinder Projects
